Pioneering Past

United Future

Made in USA

AFW Fishing Brands is a legendary line-up of innovative line, leader, terminal tackle, tools, accessories, and lures for saltwater and freshwater fishing. Each brand - American Fishing Wire, HI-SEAS, Triple Fish, C&H Lures, Billy Baits, No Alibi, and Aqua-Clear - has a rich history of product developments and industry breakthroughs dating back to 1926. Although each brand stands alone, they are united by one common principle, helping anglers everywhere enjoy fishing with family and friends and catching more fish!

AFW line and leader products are still proudly made in the USA at our wire and cable factory in Pennsylvania. We also injection-mold most of our plastic spools in-house as well as respool and package HI-SEAS and Triple Fish monofilament and fluorocarbon lines and leaders in the USA. In addition, some of our most popular selling C&H Lures and Billy Baits lures continue to be made in USA.

Uncompromising Quality

For over 95 years, AFW Fishing Brands have been providing freshwater and saltwater anglers with the finest quality line, leader, lures, and rigging products. You can rely on AFW Fishing Brands for tight lines and championship results just like the Pros!

Grand Slam® BLUEWATER LINE

**BIG FISH
TOUGH!**

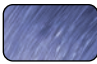

GRAND SLAM® BLUEWATER MONOFILAMENT LINE

Grand Slam Bluewater is an extra strong, premium saltwater monofilament engineered to break the will of pelagic giants. Scientifically engineered from a combination of advanced multi-polymer and copolymer, Bluewater is brutally strong - with actual breaking strengths up to 200% of the published ratings. The unique multi-polymer/copolymer blend is not only stronger than conventional mono, it also provides superior abrasion resistance, higher knot strength, and it is softer and more supple. Grand Slam Bluewater stands alone among other saltwater lines, and exemplifies our slogan "When the Money's on the Line".

- **EXTRA STRONG, LOW STRETCH**
- **UP TO 200% OF THE PUBLISHED LB BREAK**
- **HIGH KNOT STRENGTH**
- **SUPERIOR ABRASION RESISTANCE**

Grand Slam[®] mono

GRAND SLAM[®] MONOFILAMENT LINE

From ultra-light to big game, Grand Slam is up to the challenge! Its formulation provides high impact strength, excellent abrasion resistance and superior knot strength. It's equally at home on conventional and spinning tackle. Every yard is computer checked for consistent diameter and breaking strength to provide you with an unequaled level of performance - performance you can rely on. That's why we say with confidence - Grand Slam is BIG FISH TOUGH!

QUATTRO^{PLUS} LOW-VIS CAMO LINE

- **LOW-VIS 4-COLOR CAMO LINE**
- **SUPER STRONG**
- **VIRTUALLY ABRASION PROOF**
- **DISAPPEARS UNDERWATER**

QUATTRO[®] PLUS MONOFILAMENT LINE

Low-Vis 4-Color Camo

HI-SEAS popular Quattro Plus monofilament camouflage fishing line provides excellent performance while retaining all the qualities that anglers have come to love, especially its ability to disappear underwater! Quattro Plus does for fishing line what camouflage clothes do for a hunter - it breaks up visual patterns so it blends into the background. Its unique formulation gives it incredible linear and impact strength with excellent abrasion resistance. It's one line that won't give up on you during the hottest bite.

▶ TACKLE SHOP TIP ◀

When spooling down Quattro from a large spool onto reels, run the machine slower and under less tension than normal mono for best results. The unique 4-color processing can result in softer bulk spools.

Four scientifically selected colors, Black, Blue, Green, and Red are patterned in short lengths to break-up the visual impact of Quattro Plus[®] underwater, allowing it to blend into the background.

BLACK WIDOW® I.G.F.A. MONOFILAMENT LINE

100% Premium Copolymer

Black Widow monofilament has been a favorite with fresh and saltwater anglers since its introduction. It's a thin-diameter, premium copolymer monofilament that incorporates multi-color camouflaging technology, so fish don't see it. But that's only one of the reasons you'll love it. Black Widow is a supple line that lies beautifully on any reel and casts with near zero friction. It has low memory, so it won't coil up after sitting on the reel for extended periods, and it's a tough line that provides solid fish-fighting performance. For the record-conscious angler, it's I.G.F.A. True-Test rated. Whether you jig for smallmouths, troll for walleyes, plug stripers, or chunk tuna, Black Widow is a proven performer that won't let you down when the fishing heats up.

- GREAT CASTING PERFORMANCE
- EXTRA THIN DIAMETER
- I.G.F.A. TRUE TEST RATED

- Jason Moore

BLACK WIDOW PRO ANGLER TIPS

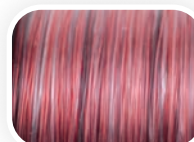

- ▶ Ideal line for the Record-Conscious Angler because of I.G.F.A. True-Test Rating.
- ▶ Useful when Fluorocarbon line isn't needed.
- ▶ Good flipping line.
- ▶ Great multi-purpose thin diameter line for low visibility in fresh and salt water applications.

1/4 lb Spool

1 lb Spool

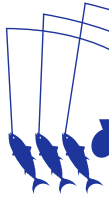

2 lb Spool

Extra-thin diameter and unique Low-Vis Black, Grey, and Red color greatly reduce visibility below the water.

THE ORIGINAL...SINCE 1961

Triple Fish

TRIPLE FISH MONOFILAMENT LINE

Triple Fish Monofilament is a dependable, angler-friendly fishing line that offers unbeatable value for weekend warriors. The line provides high knot strength, good abrasion resistance, and it is very easy to use on both spinning and conventional reels. Triple Fish mono is a great multi-purpose line for bottom fishing, wreck fishing, casting from rock piles and shorelines, top water casting, and trolling. This European-made, econo-priced line is available in clear, camo, and pink color spools for anglers that want to cast their dollars a lot farther.

- HIGH KNOT STRENGTH
- ABRASION RESISTANT
- EASY CASTING
- GREAT VALUE

Triple Fish mono is a great multi-purpose line for bottom fishing, wreck fishing, casting from rock piles and shorelines, top water casting, and trolling.

100% FLUORO-CARBON LINE

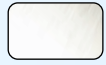

Filler Spool

100% FLUOROCARBON LINE

HI-SEAS 100% Fluorocarbon is made from the highest grade of pure polyvinylidene fluoride and extruded to exacting quality control standards. It closely matches the light refractivity of water making it virtually invisible. Supple and easy to cast, HI-SEAS 100% Fluorocarbon is an excellent specialty running line. Pro bass anglers are using it for a variety of finesse techniques in super clear lakes because it sinks faster than mono, it's undetectable by fish, and remarkably tough. It's also ideal for use as invisible leaders - if you use braid or colored line, adding a leader of HI-SEAS 100% Fluorocarbon increases hits and provides extra security against chafe and abrasion.

100% Fluorocarbon Line

- MATCHES LIGHT REFRACTIVITY OF WATER
- VIRTUALLY INVISIBLE UNDERWATER
- FASTER SINK RATE THAN MONO
- ABRASION RESISTANT

Watch it disappear! HI-SEAS 100% Fluorocarbon matches the light refractivity of water making it virtually invisible underwater!

-Casey Ashley

**GRAND SLAM®
FLUOROCARBON COATED LINE**

100% Copolymer

Grand Slam Fluorocarbon Coated fishing line is an extra strong, 100% copolymer with a fluorocarbon outer coating. The line is long casting and can be used in any water conditions. The Clear color is a top choice when visibility is a concern, such as fishing in clear shallow waters or in top water. Made from the highest quality copolymer, Grand Slam Fluorocarbon Coated is extremely supple and easy to cast using bait casting and spinning reels. The line is ultra manageable, easy to knot and delivers high knot strength and abrasion resistance.

**GRAND SLAM
FLUOROCARBON COATED
PRO ANGLER TIPS**

- ▶ Great line choice (clear) when visibility is a concern, such as fishing in clear shallow water or in top water with moving baits (spinnerbait, crankbait, etc.).
- ▶ Better choice for abrasion resistance over standard monofilament lines.
- ▶ Ideal line for virtually all techniques.
- ▶ Easy to tie to any bait or terminal tackle using a Palomar knot.

Grand Slam[®] MONO LEADER

GRAND SLAM[®] MONOFILAMENT LEADER

For everyday use in fresh or salt water, there's Grand Slam Mono Leader, the leader that's at-home bottom fishing as it is trolling for tuna. An advanced monofilament extruded with properties that make it supple, yet extra tough - Grand Slam Mono Leader performs! Unsurpassed for tying rigs for everything from flounder fishing to deep dropping for monster grouper. Grand Slam Mono Leader can be used as leader material for offshore trolling as well and the black version is popular as spear-fishing line.

- ABRASION RESISTANCE

Grand Slam Mono Leader is perfect for making rigs!

5 lb Spool

**QUATTRO® PLUS
MONOFILAMENT LEADER**

Low-Vis 4-Color Camo

Quattro Plus is a unique blend of four scientifically selected colors extruded in short lengths which break up its visual pattern underwater so it blends into the background. Quattro Plus Leader is the ultimate leader for use inshore and offshore and costs a fraction of the price of fluorocarbon. Great for chunking tuna and striped bass, making rigs for bottom fishing and leaders for offshore trolling! Quattro Plus Leader is moderately soft, yet incredibly abrasion resistant. Supple enough to make rigging fast and easy, whether you're tying knots or using sleeves, and tough enough to stand up to any finny creature.

Grand Slam[®] EXTRA HARD BLUEWATER MONOFILAMENT LEADER

GRAND SLAM[®] BLUEWATER EXTRA HARD MONOFILAMENT LEADER

Grand Slam[®] Bluewater Extra Hard Monofilament Leader is the ultimate leader material for use in situations requiring extreme tensile strength and abrasion resistance. Its extra-hard outer layer stands up to heavy abrasion and is stiffer than standard nylon leader material. It's the perfect choice when you need chafe-resistant protection against billfish of all sizes.

BIG FISH TOUGH!

**TRIPLE FISH
MONOFILAMENT LEADER**

No matter where you're headed or what you're headed for, Triple Fish Monofilament Leader provides a great combination of quality and value. This rugged mono stands up well to chaffing, bottom bouncing, surf fishing, and trolling and it is economy-priced for anglers looking to shed costs without shedding reliability. Triple Fish mono leader is available in clear and camo colors in a wide range of breaking strengths and lengths for nearly all fishing trips.

This rugged mono stands up well to chaffing, bottom bouncing, surf fishing, and trolling and it is economy-priced for anglers looking to shed costs without shedding reliability.

THE ORIGINAL...SINCE 1961

Triple Fish

TRIPLE FISH**100% FLUOROCARBON LEADER**

Rookies and veterans of fluorocarbon will immediately recognize the outstanding value of Triple Fish. This European-grade of 100% polyvinylidene fluoride has all the qualities of fluorocarbon that anglers have come to appreciate, especially the near invisibility underwater and high abrasion resistance, without as high of a price tag. If you're looking for a good quality, medium-supply fluorocarbon at a great price, then Triple Fish is for you! Triple Fish fluorocarbon is made from 100% polyvinylidene fluoride which closely matches the light refractivity of water and is virtually invisible underwater. It is heavier than monofilament so it has a faster sink rate, and also stands up well to chaffing and basic wear-and-tear.

50 yd Wrist Bracelet Spool

1 lb Spool

- **VIRTUALLY INVISIBLE UNDERWATER**
- **FASTER SINK RATE THAN MONO**
- **ABRASION RESISTANT**

If you're looking for a good quality, medium-supple fluorocarbon at a great price, then Triple Fish is the leader for you!

Grand Slam®

100% FLUOROCARBON BLUEWATER LEADER

GRAND SLAM® BLUEWATER 100% FLUOROCARBON LEADER

After that dark early morning run out of the inlet, the sky is starting to brighten and it's time for you to wet your first lines. You've done this countless times before, but today is different. Today you have the advantage of Grand Slam Bluewater 100% Fluorocarbon Leader, with its unique "disappearing" color designed to slip away into the abyss. This is the HI-SEAS 100% Fluorocarbon leader that you've come to know and trust, but with another level of invisibility. An exclusive pair of blue and pink colors is created using a proprietary coloring process which softens the leader makes it more manageable - without reducing abrasion resistance! The result is a leader that has been field-tested and refined by top offshore anglers for over a year, and which delivers more life-like action while effectively blending into its deep bluewater surroundings.

BIG FISH TOUGH!

100% FLUOROCARBON LEADER

HI-SEAS 100% Fluorocarbon is made from the highest grade of pure polyvinylidene fluoride and extruded to exacting quality control standards. It closely matches the light refractivity of water making it virtually invisible. Supple and easy to cast, HI-SEAS 100% Fluorocarbon is an excellent specialty running line. Pro bass anglers are using it for a variety of finesse techniques in super clear lakes because it sinks faster than mono, it's undetectable by fish, and remarkably tough. It's also ideal for use as invisible leaders - if you use braid or colored line, adding a leader of HI-SEAS 100% Fluorocarbon increases hits and provides extra security against chafe and abrasion.

100% Fluorocarbon Leader

100% FLUOROCARBON LEADER

- MATCHES LIGHT REFRACTIVITY OF WATER
- VIRTUALLY INVISIBLE UNDERWATER
- FASTER SINK RATE THAN MONO
- ABRASION RESISTANT

Watch it disappear! HI-SEAS 100% Fluorocarbon matches the light refractivity of water making it virtually invisible underwater!

QUATTRO[®] 100% FLUOROCARBON LEADER

25 yd Leader Spool

50 yd Wrist Bracelet Spool

- 100% FLUOROCARBON
- LOW-VIS 4-COLOR CAMO COLORING
- VIRTUALLY INVISIBLE UNDERWATER
- FASTER SINK RATE THAN MONO

Four scientifically selected colors are patterned in short lengths to break-up the visual impact of Quattro Fluorocarbon underwater, allowing it to blend into the background.

QUATTRO[®] 100% FLUOROCARBON LEADER

Quattro 100% Fluorocarbon combines HI-SEAS exclusive Quattro 4-color camo technology with fluorocarbon line! The unique coloring process does for fishing line what camouflage clothes do for the hunter – it breaks up visual patterns making the line blend into its surroundings. Four scientifically selected colors are alternated along the fluorocarbon reducing light transmission and creating a whole new level of invisibility. The line is smooth and supple, and is the best handling fluorocarbon yet! Now you can increase your line and leader rating without sacrificing stealth or fishability!

GRAND SLAM® BRAID

When you want the ultimate in sensitivity and bone-jarring hook sets, there's only one line to have on your reels - HI-SEAS Grand Slam Braid - the line that gives you more of what you buy a super braid for! Grand Slam Braid is thinner, rounder, and packs uniformly on spinning and conventional reels. The line will not bury in reels, knots are stronger and don't slip, and abrasion resistance is greatly enhanced. Its 4, 6, & 8 carrier construction and compact diameter reduces wind knots and rod tip wraps. You'll cast further and feel your lures working like never before with unprecedented performance. Because the line has near zero stretch, even the most subtle bites will be transmitted back to your hands for immediate response. When it's time to set the hook, a flick of the wrist will do the job! Grand Slam Braid is the absolute pinnacle of fishing performance. Its a line that can make anyone fish more like a pro! Made in USA.

Grand Slam® BRAID

These braided lines are thinner, rounder, and pack uniformly on spinning and conventional reels. The line will not bury in reels. Knots are stronger, don't slip, and abrasion resistance is greatly enhanced.

DOWNRIGGER BRAID

If you're really serious about fishing with downriggers, it's time to get the Downrigger Braid advantage. This braided fiber line will help get your lures deep while providing a more stealthy approach to wary game fish. Downrigger Braid "cuts" the water smoothly with less resistance than cable or monofilament and it is thinner per rated test than either material. That means you'll experience less blow-back at trolling speeds. Less blow-back equals greater depth capabilities. Plus, it won't generate the hum or bubble stream associated with downrigger cable which can spook some game fish. Downrigger Braid is the best improvement to controlled depth fishing since the invention of the downrigger. Made in USA.

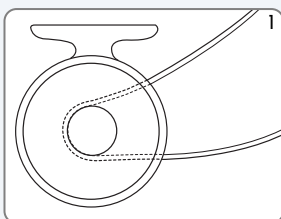

Downrigger Braid

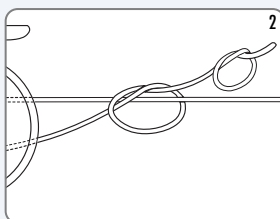

Test lb	Test kg	Diam. Inch	Diam. mm	Mono Equiv. lbs	Length Feet	Length Meters	Number of Filaments	Part #
150	68.2	.022	0.56	30	450	137	12	RB150GR-450FT
200	90.9	.023	0.58	40	450	137	16	RB200GR-450FT

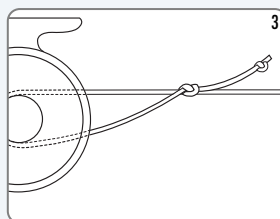

KNOT FOR ATTACHING BRAID TO DOWNRIGGER

1. Pass Downrigger Braid through the reel arbor. (Be sure downrigger reel is suitable for superlines).

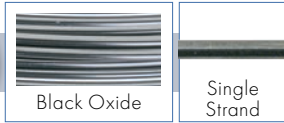

2. Tie an overhand knot around the standing line. Then, tie a second overhand knot on the tag end.

3. Pull tight and snip-off excess. Finally, snug-down the first overhand knot on the reel arbor.

© AFW Fishing Brands

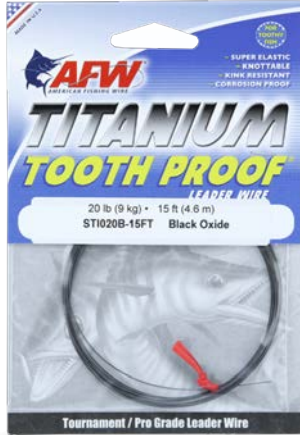

- THIN DIAMETER-LESS PROFILE
- TOUGH ABRASION RESISTANCE
- ELIMINATES TROLLING HUM
- NEAR ZERO STRETCH
- HOLD KNOTS WELL

TITANIUM TOOTH PROOF®

Titanium Single Strand Leader Wire

○ Raise your angling success to a higher level with Titanium Tooth Proof Leader Wire! This revolutionary leader wire stretches and recovers to set hooks and prevent bite-offs. Special smoke-black finish hides beneath the water ready to capture Barracuda, King Mackerel, Wahoo, and other toothy big game fish. The technologically advanced titanium alloy delivers dramatic kink resistance and flexibility. No more haywire twisting - you can tie Titanium Tooth Proof to bait and line using the Clinch and Albright knots or connect with crimping sleeves. AFW's special blend of Titanium combines unequalled corrosion resistance and tremendous strength. Made in USA.

Titanium Tooth Proof is also available as a convenient Leader Wire Kit - complete with Stainless Steel Sleeves and Rubber Shrink Tubes!

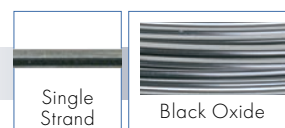

TITANIUM TOOTH PROOF® LEADERS

Titanium Single Strand Leaders

 Super-elastic Titanium Tooth Proof Leaders stretch to absorb the strike of a fish, then snap back and recover during the hook-set. These leaders are made with AFW's special blend of Titanium alloy wire - engineered to deliver tremendous strength along with dramatic kink resistance. Fish with confidence knowing these are among the highest quality leaders available. Crimped ends are covered with black shrink wrap for a smooth, low profile, stealthy design. Leaders are made with AFW 100% Stainless Steel Mighty Mini Swivels (p. 46) with a compact design that is up to 3x's stronger than brass swivels – providing less drag and smooth rotation. Snaps are high strength stainless steel crosslock style for maximum security. Use single strand leaders for the best bite protection, superior flexibility and unmatched kink resistance. Wire Made in USA.

TOOTH PROOF®

Stainless Steel Single Strand Leader Wire

Tooth Proof leader wire lives up to its name and provides maximum protection against the ferocious jaws of Barracuda, King Mackerel, Wahoo and other toothy fish. Made from specially controlled Type 304 stainless steel alloy to be hard, but not brittle, and to deliver the perfect combination of flexibility and strength. Tooth Proof possesses incomparable abrasion resistance and tames the toughest toothy fish. AFW's unique pre-straightening process eliminates cast, providing a straighter leader wire with improved kink resistance. Special Camouflaged Brown finish vanishes in deep water. Tournament tested tough, this proven leader wire continues to put anglers on the winner board! Made in USA by AFW.

WIRE STRAIGHTENER TOOLS

AFW Wire Straightener tools make it easy to straighten wire that has been worked. Put the rollers in your hand in the open position with each of the rollers side by side. Lay the end of a piece of wire that requires straightening on the three rollers, then move the rollers until they form a triangle with the wire in the center. Grasp the rollers in one hand holding tightly, then pull the wire through the rollers to straighten. May need to pull through a second time for highly bent wires. Works great with Tooth Proof sizes 5-15 and Copper Rigging Wire!

1. Put the rollers in your hand in the open position, with each of the rollers side-by-side.

2. Fold the rollers closed tightly, then pull the wire through to straighten.

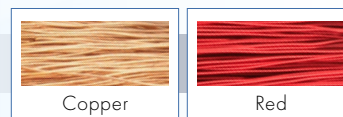

GREAT FOR TOOTHY FISH

Precision straightened and cut for fast, easy rigging!

Available in Tubes of 12 inch & 36 inch Lengths

GREAT FOR TOOTHY FISH

Available in 50 piece & 1 lb tubes!

Works great with Tooth Proof!

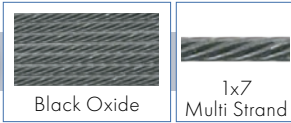

Part Number TPWS-ECONO

Part Number TPWS-DELUXE

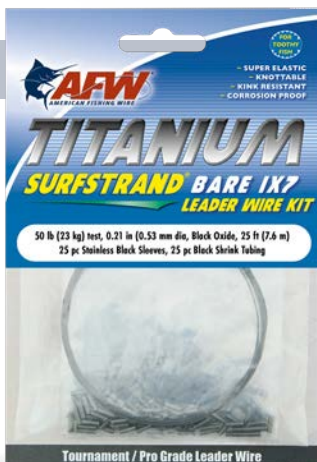

GREAT FOR TOOTHY FISH

- WIRE STRETCHES AND RECOVERS TO SET HOOKS
- DRAMATIC KINK RESISTANCE
- UNMATCHED FLEXIBILITY
- STEALTHY GUNMETAL BLACK FINISH

Titanium Surfstrand is also available as a convenient Leader Wire Kit - complete with Stainless Steel Sleeves and Rubber Shrink Tubes!

LEADER WIRE KIT

TITANIUM SURFSTRAND®

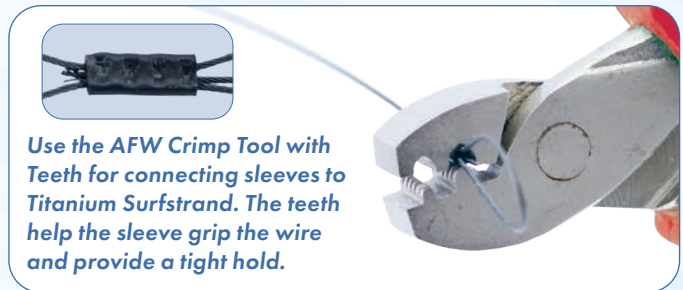

Bare 1x7 Titanium Leader Wire

Titanium Surfstrand is an uncoated, 1x7 super-elastic leader wire that stretches to absorb the strike of a fish - then snaps back and recovers during the hook-set! This wire is made with a special blend of Titanium alloy wire and engineered to deliver tremendous strength along with dramatic kink resistance. Fish with confidence knowing this is among the highest quality leader wire available. Use Titanium Surfstrand for the best bite protection, flexibility, and unmatched kink resistance! Made in USA by AFW.

Crimping and Shrink Sleeve Instructions

- First, thread a piece of shrink tubing on to the wire, followed by a crimp sleeve, leaving about a 3 inch (7 cm) tag end.
- Next, thread the wire through your terminal tackle component (snap, swivel, or hook) and completely back through the sleeve a second time, leaving about a 2 inch (5 cm) tag end.
- Next, take the tag end of the wire and pass it fully back through the sleeve a third time.
- Hold the sleeve between your finger and thumb and pull the tag end snug, leaving a tiny loop at the opposite end of the sleeve.
- Firmly crimp the center of the sleeve using the AFW Crimp Tool with Teeth (item no. TPCRP6.0), or standard AFW Crimping Pliers, and then cut the tag end of the wire as close as possible to the sleeve being careful not to cut the loop.
- Finally, slide the piece of shrink tubing over the crimped sleeve and gently apply heat to neatly conceal the connection and tag end.

TITANIUM SURFSTRAND® LEADERS

Titanium 1x7 Multi Strand Leaders

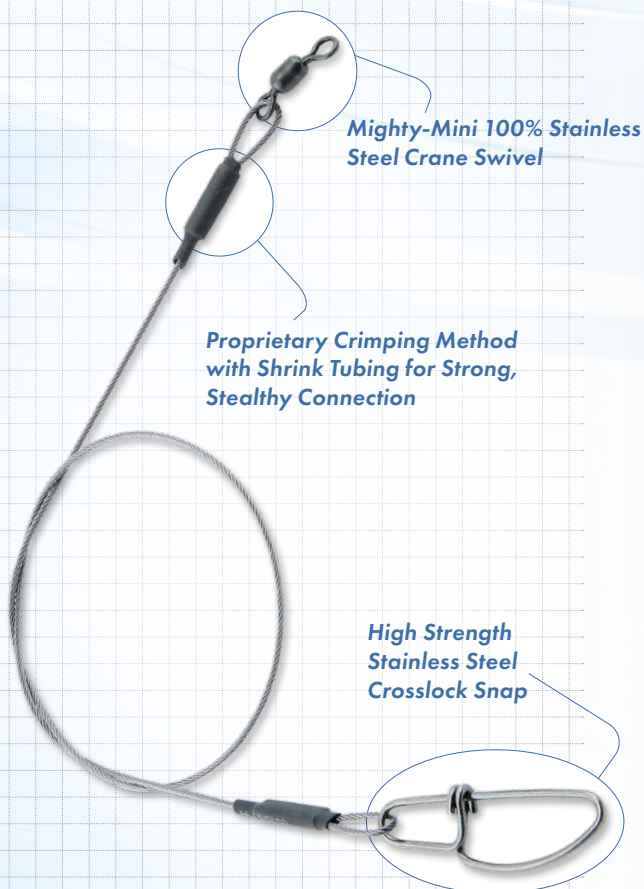

AFW's super-elastic Titanium Surfstrand Leaders stretch to absorb the strike of a fish, then snap back and recover during the hook-set. These leaders are made with AFW's special blend of Titanium alloy wire - engineered to deliver tremendous strength along with dramatic kink resistance. Fish with confidence knowing these are among the highest quality leaders available. Crimped ends are covered with black shrink wrap for a smooth, low profile, stealthy design. Leaders are made with AFW 100% Stainless Steel Mighty Mini Swivels (p. 46) with a compact design that is up to 3x's stronger than brass swivels - providing less drag and smooth rotation. Snaps are high strength stainless steel crosslock style for maximum security. Use Titanium Surfstrand Leaders for the best kink resistance, superior flexibility and unmatched kink resistance. Wire made in USA by AFW.

GREAT FOR TOOTHY FISH

Knottable

SURFLON® MICRO SUPREME

Nylon Coated 7x7 Stainless Steel Leader Wire

Perhaps the best leader wire available! Surflon Micro Supreme is miniature 49 strand stainless steel wire that is extremely flexible and kink resistant. This wire is ideal for many types of sport fishing because it can be knotted to your bait and line like monofilament, it provides greater flexibility and less stretch than monofilament, and is generally smaller diameter per pound test, and therefore, less visible in the water. Surflon Micro Supreme is extra limp and has virtually no memory or stretch. The wire enhances the action of live and artificial baits and adds a level of realism never before attainable using wire or other leader materials such as monofilament and fluorocarbon. This wire is ideal for presenting life-like bait at any depth and can fool tackle-shy Billfish while withstanding the violent razor-sharp strikes of King Mackerel and Shark. Excellent for casting flies and tempting the most discriminating toothy fish to the surface. No other wire offers more realistic action both above and below the water. Low elasticity and high sensitivity allow you to set hooks faster and with more accuracy. Attach using common monofilament knots such as the Albright Knot, Clinch Knot, Nail Knot, Perfection Loop, Surgeon's Loop, or Uni-Knot. Made in USA by AFW.

Surflon Micro Wires Tie as Easy as Monofilament and Have the Strength of Stainless Steel!

- Jason Moore

SURFLON® MICRO ULTRA

Nylon Coated 1x19 Stainless Steel Leader Wire

 Surflon Micro Ultra 19 strand is more flexible than our Surflon 1x7 (p. 32), but not as flexible as our Surflon Micro Supreme 7x7 (p. 30). Surflon Micro Ultra has a smooth nylon coating that adds kink resistance, provides longer life, and makes the wire easy to knot. You can attach this leader wire using common monofilament knots such as the Albright Knot, Clinch Knot, Nail Knot, Perfection Loop, Surgeon's Loop, Uni-Knot, etc... Low stretch and high sensitivity allow for fast hook sets and remarkable performance. The limp, supple qualities make it especially well-suited for fly fishing tippet and predator leaders where life-like bait presentation is required along with strong bite protection. Surflon Micro Ultra is an economical alternative to Surflon Micro Supreme and an excellent leader wire for Barracuda, Billfish, Bluefish, King Mackerel, Shark, Wahoo, and other game fish. Made in USA by AFW.

THE ORIGINAL KNOTTABLE LEADER WIRE SINCE 1995!

AFW's MINIATURE NYLON COATED 7x7 & 1x19 LEADER WIRE

While you do not need wire leader to catch prized species such as Billfish, Sailfish, Tarpon, or Striped Bass, many anglers use wire to prevent bite-offs from non-targeted toothy fish that often hit their bait. Single strand wire and other brands of multi-strand wire are stiff and can spook tackle-shy fish such as Billfish and Tarpon. AFW's miniature nylon coated 7x7 and 1x19 stainless steel wires behave more like monofilament and provide an increased level of natural bait action along with a more realistic presentation. These wires can be knotted to your bait & line like mono, combine higher breaking strengths in smaller diameters, and deliver reduced visibility and maximum bite protection. Diameter for diameter, absolutely no other multi-strand fishing wires offer more flexibility and strength!

This wire is ideal for presenting life-like bait at any depth and can fool tackle-shy Billfish while withstanding the violent razor-sharp strikes of King Mackerel and Shark.

Surflon 1x7 is an effective leader wire for hard-charging, toothy fish such as Bluefish, Muskie, and Mackerel

SURFLON®

Nylon Coated 1x7 Stainless Steel Leader Wire

 Surflon 1x7 is a great all-around leader wire for toothy fish. This wire is our Surfstrand 1x7 stainless steel with a smooth coating of nylon. A specially selected grade of nylon, tough yet flexible, is used to seal out water, reduce visibility, and improve the life of the line. Compared to old style 1x3 construction, Surflon's 1x7 construction offers higher break strength and more realistic action. Surflon 1x7 is an effective leader wire for hard-charging, toothy fish such as Bluefish, Muskie and Mackerel. Made in USA by AFW.

SURFLON® CRIMPING KIT

Kit contains a 30 ft (9.2 m) spool of 30 lb (14 kg) Black Surflon 1x7 leader wire, 36 pc of #3 Black Crimping Sleeves, and Lightweight Crimping Pliers for making leaders and rigs. Convenient all-in-one package is a value versus buying components separately. Wire made in USA by AFW.

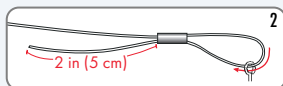

Part Number
TT030B

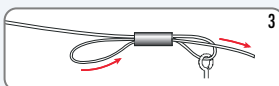

Single Barrel Sleeves Crimping Instructions

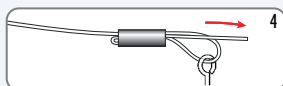

First, feed the wire through a crimp sleeve leaving about a 3 inch (7 cm) tag end. Use single-barrel sleeves with an inside diameter of more than twice the wire diameter you are crimping.

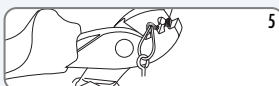

Next, thread the wire through your terminal tackle component (snap, swivel, or hook) and completely back through the sleeve a second time, leaving about a 2 inch (5 cm) tag end.

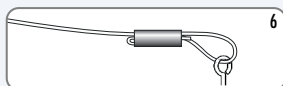

Next, take the tag end of the wire and pass it fully back through the sleeve a third time.

Hold the sleeve between your finger and thumb and pull the tag end snug, leaving a tiny loop at the opposite end of the sleeve.

Firmly crimp the center of the sleeve using the AFW Crimp Tool with Teeth (item no. TPCR6.0), or standard AFW Crimping Pliers.

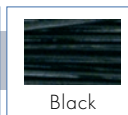

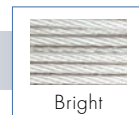

Finally, cut the tag end of the wire as close as possible to the sleeve being careful not to cut the loop.

SURFLON® LEADERS

 Heavy-duty Surflon Leaders are made with Black, nylon coated Surflon 1x7 stainless steel wire and high quality AFW Terminal Tackle. Leaders are double-crimped for extra strength and are great for many types of toothy game fish. Surflon is also available with Blood Red nylon coating as Bleeding Leaders™ (p 35).

Blood Red

BLEEDING LEADER™ WIRE

Blood Red Nylon Coated 1x7 Stainless Steel

Bleeding Leader Wire is the World's First Blood Red nylon coated leader wire. The unique red nylon coating mimics actual blood in top water fishing conditions to attract fish. In deeper water, the color Red is filtered out faster than other colors on the spectrum and 'vanishes' to fish. Bleeding Leader Wire is ideal for all types of toothy fish and is made from our strong Surfion 1X7 stainless steel leader wire. Made in USA by AFW.

SURFSTRAND®

Bare 1x7 Stainless Steel Leader Wire

Surfstrand 1x7 is made of corrosion resistant, spring temper stainless steel. Compared to our competitor's old style 1x3 construction, Surfstrand's 1x7 construction offers higher break strength and more realistic action. The wire is specially stranded to deliver superior kink resistance, and the high strength of stainless makes this an excellent wire for leaders, lures, and trolling. Camouflaged Brown finish minimizes reflections and disappears beneath the water. Attach Surfstrand using crimping sleeves and crimping pliers or tie with a figure 8 Knot. Made in USA by AFW.

Attach Surfstrand using crimp sleeves or tie with a Figure 8 Knot.

FOLLOW THESE STEPS TO PREVENT FRAYING AND MAKE PROFESSIONAL QUALITY LEADERS WITH SURFSTRAND MICRO SUPREME AND MICRO ULTRA

Briefly heat the area to be cut with a lighter or small flame.

Cut the wire in heated section under no tension using razor-sharp cutters such as AFW Nipper Tool (TPNIP1). The result is a clean cut that will thread easily through sleeves.

Tie or use AFW miniature sleeves and the Micro Crimp Tool (TPCRIMP2) to make terminal connections.

Securely crimped wire.

SURFSTRAND® MICRO SUPREME

Bare 7x7 Stainless Steel Leader/Trace Wire

 Surfstrand Micro Supreme 7x7 feels more like thread than wire and is more flexible than our 1x19 variety, listed below. This miniature 49 Strand stainless steel trace wire slips through the water and has virtually no memory or stretch. Surfstrand Micro Supreme 7x7 is the preferred wire of professional European Pike and Walleye (Zander) anglers. Camouflaged Brown finish blends well in most rivers and lakes reducing visibility. An outstanding leader/trace wire for finicky toothy critters! Made in USA by AFW.

SURFSTRAND® MICRO ULTRA

Bare 1x19 Stainless Steel Leader/Trace Wire

 Surfstrand Micro Ultra is miniature diameter 1x19 stainless steel leader wire that is more flexible than 1x7, but not as flexible as 7x7. Surfstrand Micro Ultra is an economical alternative to Surfstrand Micro Supreme (above). This 19 Strand wire was originally designed for European Pike and Walleye (Zander) anglers. The extremely miniature diameters are practically invisible in the water. Ideal for catching toothy fish such as European Pike where delicate bait presentation is required. Made in USA by AFW.

SURFSTRAND® DOWNRIGGER WIRE

Surfstrand Downrigger Wire is specially stranded 1x7 Stainless Steel wire that provides the flexibility and resistance to bending fatigue required for use on downriggers. Wire is available with and without pre-rigged assemblies. The Complete Assembly includes a stainless steel thimble and a 225 lb (102.3 kg) stainless steel coast lock snap swivel. The Shock Kit Assembly includes a protective spring, two stoppers, and a 225 lb (102.3 kg) stainless steel coast lock snap swivel. Surfstrand Downrigger Wire is ideal for fresh and saltwater use and is designed for all makes of manual and electric downriggers. Available in Bright stainless and Camouflaged Brown finishes. Made in USA by AFW using US and imported parts.

CAMO COLOR VARIATIONS

The purpose of the camouflage finish is to minimize light reflections and reduce the shine and brightness of the wire - making it less visible to fish. Our unique camouflaged brown finish is achieved through a natural oxidation process. Due to many variables in this process, the color will vary from light brown to a dark purple. Please see the photos to the left demonstrating this color variation.

49-STRAND™

 Made from high strength, corrosion resistant Type 304 stainless steel, 49-Strand 7x7 cable provides excellent kink resistance and bite protection against Shark and other big game toothy fish. Oftentimes when a Shark strikes a bait, they twirl violently. This motion can kink single strand leader wire and can actually be more destructive to your tackle than the fierce bite. 49-Strand resists kinking, wrestles back, and allows you to hook up and haul in. Available in Bright and Camouflaged Brown. Made in USA by AFW.

Copper

Copper is 13% Heavier than Stainless Steel

Bright

SURFSTRAND® COPPER

Bare 1X7 Copper Trolling Wire

Surfstrand Copper Trolling wire is bare, 1x7 stranded copper wire that has 13% greater density than stainless steel. This line sinks more rapidly than stainless steel, and allows you to troll deeper with less line in the water. The 1x7 strand construction gives this line good flexibility and kink resistance. Many anglers report increased strike rates with the use of copper terminal tackle - believing that the positive ions in copper help to attract fish. Made in USA by AFW.

STAINLESS STEEL TROLLING WIRE

AFW's Stainless Steel Trolling Wire is soft single strand wire carefully annealed for maximum flexibility and strength. The line sinks rapidly allowing the angler to get down deep using shorter lengths of line. It is kink and abrasion resistant and ideal for both fresh and saltwater trolling. The high strength of 300 series stainless steel results in a small diameter per pound test providing greater reel capacity. Great for reaching Stripers and other fish in deep waters. Made in USA by AFW.

Great for Reaching Fish in Deep Waters!

MONEL® TROLLING WIRE

 AFW's single strand soft Monel Trolling Wire is the ultimate line for wire fishing. Special processing by AFW gives the wire exceptional kink resistance with excellent ductility and high strength. This nickel-copper alloy provides maximum corrosion resistance in fresh and saltwater and, due to its greater density, sinks more rapidly and stays deeper than stainless steel and other trolling lines. Excellent wire for dragging baits at depth and hooking hard-charging game fish such as Striped Bass and Wahoo. Made in USA by AFW.

2-Connected Spools,
an AFW Exclusive!

MARKING WIRE LINE FOR TROLLING

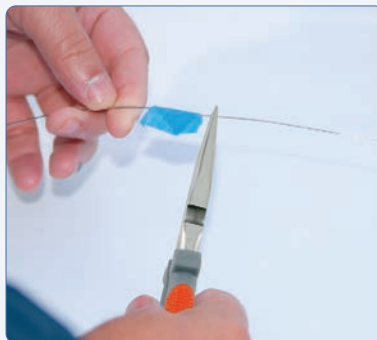

Wire line fishing is one of the oldest and most reliable techniques to control the depth of trolling lures. Typically stainless steel wire sinks at the rate of one foot of depth for every ten feet of wire in the water. This formula is based on a trolling speed of 3 to 4 knots using a medium weight trolling lure. Umbrella rigs tend to run deeper than lures and spoons, and heavier lures and spoons will run deeper than lighter ones. Variables such as boat speed, weight and shape of the lure, and water current will affect depth. The following method for marking trolling wire is used by anglers who specialize in pursuing striped bass and bluefish in Mid Atlantic waters and is based on 300' of stainless steel or Monel trolling wire rated at 40 to 60 pound test.

STEP 1: Purchase a length of telephone wire at any hardware or home improvement store and strip off a length of outer sheath. Then cut at least four sets of each color 5 in long. Spool 200 yards of 50-lb monofilament backing on the reel. Hi-Seas Quattro Plus or Grand Slam monofilament is ideal.

STEP 2: Attach a Mighty-Mini 100% stainless steel swivel to the end of the wire on the spool using a haywire twist (see AFW Haywire Twist Tool on page 81) and tie the monofilament backing from your trolling reel to the other side. Be sure the swivel you select fits smoothly through the guides on your trolling rod.

STEP 3: Measure the first fifty feet of wire and mark it. Using HI-SEAS long nose pliers, put about a dozen tiny bends in the wire being careful not to kink it.

STEP 4: The finished bends should look like this.

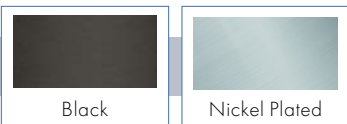

STEP 5: Wrap a section of colored copper wire around the trolling wire as shown with the middle centered over the bends you just made.

STEP 6: Use a butane lighter to heat the plastic coating for a couple seconds so it fuses together. Do not burn it.

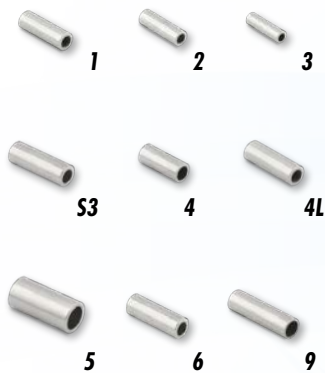

Repeat this with a different color wire at 100', 150', 200' and 250' intervals from the terminal end. This will provide different colored depth markers corresponding to 10', 15', 20' and 25'. The lure will be at approximately 30' when you are down to the mono backing and all 300' of wire is in the water.

AFW LEADER SLEEVES

Sleeves are made of copper and are available in Nickel plated and Black oxidized. Double Barrel and Thin Wall Double Barrel Sleeves, available in Black finish, are excellent for use with big game mono leader material. Sleeves can be fitted to wire, monofilament, and other various lines. Burr-free nonabrasive finish combined with high strength and corrosion resistance makes AFW's sleeves the preferred choice of professional leader, lure, and tackle manufacturers. Packaged in Retail Packs, 100 piece, and 1,000 piece packages for resale, and 5,000 piece bulk packs for tackle manufacturers.

MIGHTY-MINI™

Superior Holding Power!

ACTUAL SIZE

- 100% STAINLESS STEEL
- 3X STRONGER THAN BRASS SWIVELS
- COMPACT SIZE FOR REDUCED VISIBILITY
- TIGHT TOLERANCES ASSURE SMOOTH ROTATION

MIGHTY-MINI™ CRANE SWIVELS

100% Stainless Steel

Mighty-Mini Crane Swivels are 100% stainless steel and are 3 times stronger than conventional components of the same size. Smart anglers know that terminal tackle can spook wary game fish. The Might Mini line of compact, 100% stainless steel swivels was engineered to be smaller and stronger than the leading brands of swivels on the market. Now you can use swivels for your rigs, and snap swivels for attaching lures, that are less visible and significantly more powerful. Mighty-Mini Swivels also have less drag and provide enhanced rotation for more strikes. For decades, swivels were manufactured from brass because it is a relatively corrosion resistant material and easy to manufacture. Still today, the leading brand of mini swivels continues to use brass bodies with stainless steel rings that cannot match the strength of Mighty Mini Swivels. Recent advances in manufacturing enable us to bring you these revolutionary, smaller and stronger components, and are the ultimate in connection protection.

BRASS CRANE SWIVELS

Brass swivels are manufactured to exacting specifications to provide smooth rotation and prevent line twisting and kinking. Eyes are precisely formed to prevent pull-out under severe tension. Offered in Nickel and Black finishes. For our strongest swivels please see Mighty-Mini 100% stainless steel swivels (p. 56), or see our Ball Bearing Swivels for the ultimate in fluid rotation (p. 49).

BALL-BEARING DUAL SNAP SWIVELS

Brass Body, Stainless Steel Bearings, Double-Welded Rings

These dual-rotation brass Dual Snap Swivels are engineered to survive big game fishing, especially when you want to change lures quickly while using in-line weights. Smooth operating stainless steel ball-bearing swivels provide fluid motion preventing line twisting and kinking.

Tournament-Grade Dual Snaps Provide The Ultimate Connection Protection!

STAINLESS STEEL BALL-BEARING DREDGE SWIVELS

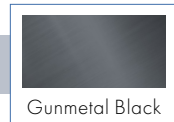

Solid Stainless Steel Body & Bearings, Double-Welded Rings, Corkscrew Snaps

Now you can switch out your dredges quickly and confidently without fear of losing gear. Only AFW offers true 500 lb and 1,000 lb test rated Dredge Swivels. We beefed up the thickness of the stainless steel corkscrew snaps for added strength and security, and we paired the snaps to our proven dual-rotation stainless steel ball bearing swivels with welded rings. Our snaps and our swivels exceed our strength ratings, not just our swivels like other versions sold on the market. The stainless steel ball bearing swivel in the dredge swivel is patented under D549,750 S.

TACKLE BOXES

Keep your tackle organized (or at least try) with these value-priced tackle boxes. The removable dividers allow you to adjust the compartments for different sizes or amounts of sleeves, components, bait, or other fishing items. Item D is 19.5 in (49.5 cm) long and fits straight lengths of wire, crimps, and other rigging components, as well as multiple crimping pliers and leader spools. Item C is a universal size box that fits most hard and soft tackle storage systems.

RIGGING BEADS

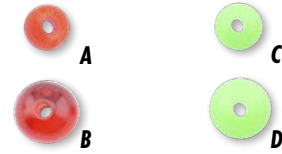

Round beads work great for all types of rigs. Choose luminescent green for bottom rigs and red for most other applications. Acrylic Tri-Beads fit together snugly and work well for making stiff-rigs and for adjusting the hook spacing on offshore lures. Available in a variety of popular colors.

Tri-beads lock together to create a stiff-rig.

LUMINOUS GLOW BEADS

These are the green glow beads used by more rig makers than any other. Not only do they work great for rigging high-speed trolling lures, they increase bites when used on bottom fishing rigs for snapper, grouper, sea bass, blackfish, cod, rockfish, tilefish and pollock - and they can't be beat on deep drop rigs. Buy them by the bag, add them to your rigs and watch your catch rates soar!

HI-SEAS LOOP PROTECTORS

No loop connection is complete without some type of anti-chafing gear to protect leader material from friction and abrasion that can be caused by hooks or swivels under extreme pressure. Loop Protectors are recommended for use with monofilament leader material and act as a barrier to protect and increase line longevity.

Loop Protectors - Stainless Steel

GAFFS

AFW Gaffs feature a sturdy aluminum shaft, strong stainless steel offset hook, and non-slip grips. These Gaffs are easy to maneuver, quick in the water, compact, and easy to stow on your boat. The sturdy lightweight shaft allows you to bring fish into the boat quickly with less thrashing about. AFW gaffs are available in 3 ft (0.9 m), 4 ft (1.2 m), and 6 ft (1.8 m) shaft lengths with a rugged stainless steel offset hook in 2 in (5 cm), 3 in (7.6 cm), and 4 in (10.1 cm) offset lengths. Lightweight and tough, AFW Gaffs are fashioned from the finest materials with easy-to-sharpen triangular points.

Gaffs

	Hook Offset in (cm)	Shaft Length ft (m)	Part #

G	4 (10.1)	6 (1.8)	TA-GA472S

PLANERS

The AFW Planer is an innovative and precisely balanced piece of fishing gear. A lead weight acts as a keel and balance to keep the planer running straight at controlled depths. When the planer is in the water in diving position, water pressure against the blade forces the planer down. When a fish strikes, the balance is changed. The planer then trips and produces a slight upward drag, which allows you to fight your fish rather than a heavy lead sinker.

Planers

D

A. WILDFIRE BRAID CUTTER

Use the battery operated WildFire Braid Cutter to quickly and easily cut and fuse the ends of braided fishing lines! Uses two AAA batteries (not included). Also great for Nylon and Poly-cords, as well as "sealing" frays in many types of lines.

Part Number
HT-CORDCUT

Cuts and fuses braided fishing lines with ease!

B. HEAVY DUTY 10 IN HOOK REMOVER

Heavy Duty Hook Remover is a safe and effective way of removing hooks or lures without ever touching the fish. Protect your hands from hooks, teeth, and gills. Made from stainless steel. It's the perfect catch and release tool! 10 in (25.4 cm).

Part Number
TPHOOKR1

C. SPLIT RING PLIERS

Designed for opening AFW's split rings and making terminal tackle attachments fast and easy. Hardened steel nose separates rings and keeps them separated while you secure components. Spring hinge increases comfort by reducing fatigue.

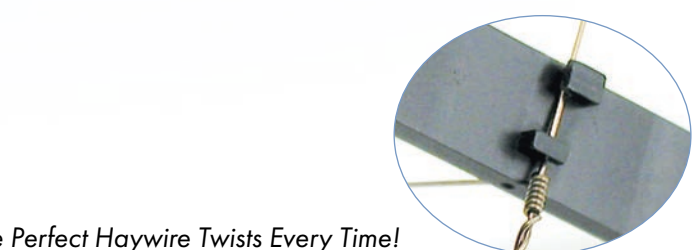

Part Number
TPSPLTRG1

D. WIRE LOOPING PLIERS

Use these Wire Looping Pliers to bend wire into uniform loops every time. Great for making your own rigs. Simply wrap the wire around one of the three different size loops, then squeeze to close the concave jaw which forms a consistent loop every time. Comfortable handles surround a corrosion resistant stainless steel box joint construction. 6 in (15.2 cm).

Part Number
TPWLI

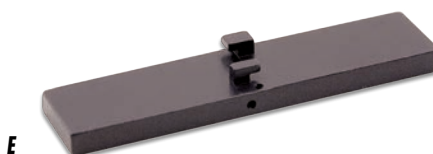

E. HAYWIRE TWIST TOOL

Now you can wrap leader wire into clean, even twists, just like the pros with the patented Haywire Twist Tool! Use this tool to rig Tooth Proof #2 through #15 and other single strand stainless wire diameters .011 in (0.28 mm) - .035 in (0.89 mm). Not for use with Titanium Tooth Proof. Detailed instructions provided in package! Patented US 6,681,514.

Part Number
TPTWISTR1

Make Perfect Haywire Twists Every Time!

PATENTED US 6,681,514

Teeth help the sleeve grip the wire and provide a tight hold.

A

A. 6 IN CRIMP TOOL WITH TEETH

The Crimp Tool with Teeth is designed to crimp single-barrel sleeves sizes #0 - #6. The specially designed teeth help the sleeve grip the wire and provide a tight hold. Recommended for connecting Titanium Surfstrand. Features an all Stainless Steel body, textured grip handles, and box joint construction. 6 in (15.2 cm).

Part Number

TPCRP6.0

B

B. MICRO CRIMPER

Unique 2-step micro crimping tool yields a secure attachment for #0 & #1 sleeves. Use the lower section to crimp and the upper section to round off sleeve.

Part Number

TPCRIMP2

C

C. LIGHTWEIGHT CRIMPING PLIERS

Designed to crimp AFW's single barrel leader sleeves up to size No. 4. An inexpensive tool for light-duty rigging.

Part Number

TPCRPLT

D

D. 5½ IN CRIMPING & CUTTING PLIERS

This mini crimping and cutting tool gives you the functionality of our larger 8.5 in model in a convenient pocket size. Use these mini pliers to crimp AFW sleeves up through size 6. The front nipper is for lightweight use and it will cut mono, single strand soft wire, and multi-strand leader wire. This tool fits easily into small tackle boxes and your pocket. Drop forged steel construction.

Part Number

TPCRP5.5

E

E. 8½ IN CRIMPING & CUTTING PLIERS

This tool has three crimping dies designed for crimping AFW's single barrel leader sleeves up to size #S5. Front diagonal cutter will cut soft single strand and multi strand leader wire. Drop forged steel construction.

Part Number

TPCRP8.5

F

F. 9½ IN CRIMPING & CUTTING PLIERS

This tool has three crimping dies and is designed to crimp all AFW single barrel leader sleeves. Front diagonal cutter will cut soft single strand and multi strand leader wire. Longer length handles provide better leverage. Drop forged steel construction.

Part Number

TPCRP9.5

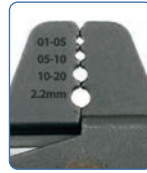

All AFW Tools are Retail Packaged and provide usage instructions on the back.

A. ECONO CRIMPING PLIERS

These economy-priced crimping pliers have four dies designed to crimp oval aluminum sleeves and double barrel copper leader sleeves from 0.1 mm to 2.2 mm O.D. The tool is made from carbon steel and has a dual-action hinge for increased leverage and easier crimping. Two side cutters cut leader strand and cable, and there is a safety lock to keep the tool securely closed when not in use.

Part Number
TPCRPHD-ECONO

B. PRO HAND SWAGER

These professional quality hand swagers are heat-treated and chrome plated for increased strength and corrosion resistance. There are four crimping dies designed to crimp aluminum and double barrel copper sleeves from 0.1mm to 2.2mm O.D. The tool is spring-loaded and has articulated jaws and cushioned handles for easier crimping. For heavier duty crimping, we recommend the HT-450-5 and the HT-750-6 below.

Part Number
HT-250-4-PRO

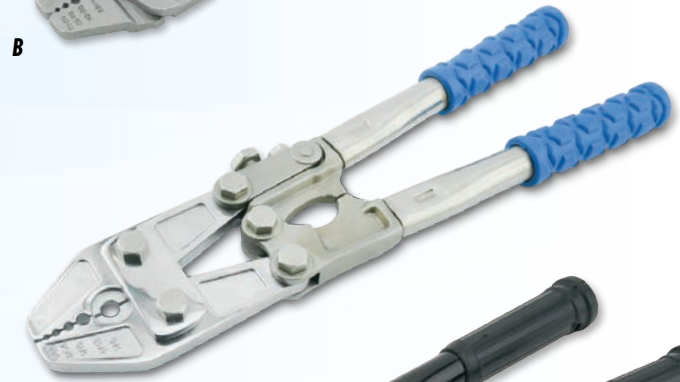

C & D. HEAVY DUTY HAND SWAGING TOOL

The ultimate hand tool for rigging mono or cable. Its articulated, five position precision jaws compress sleeves evenly with the ideal pressure every time. Handles sleeves from 0.8 to 3.3mm. If you're serious about offshore rigging, this is the tool you want on your workbench.

Part Number

HT-450-5S Stainless Steel
HT-450-5 Black

Make a perfect swage every time with Hand Swagers.

E. BENCH CRIMPER

This Bench Crimper is ideal if you find that hand crimpers strain your hands or you simply have several rigs to make. The longer handle gives you increased leverage and crimping power - great for crimping large, bulky rigs. Six positions available ranging from 3.6 mm to 7.0 mm.

Part Number
HT-750-6

Hole Size	Sleeve Size
3.6 mm	1.7 mm
3.9 mm	2.0 mm
4.3 mm	2.3 mm
4.6 mm	2.8 mm
5.7 mm	3.3 mm
7.0 mm	4.2 mm

A

A. NIPPER TOOL

Designed to cut Micro Wire and other soft lines. Sharp angled blades cut cleanly and prevent fraying. Spring hinge ensures long life, dependable use, and fast cuts.

Part Number
TPNIP1

B

B. STAINLESS STEEL MONO CUTTER

This premium stainless steel mono cutter is a precision tool that delivers a smooth cut on even the largest sized mono. These unique cutters are also equipped with a locking mechanism to keep the jaw closed for safety and the beveled stainless steel blade which eliminates burrs when cutting. Rivet-joint construction. 8 in (20 cm).

Part Number
HT-MONOCUT

C

C. TOOTH PROOF® WIRE CUTTER

Kingfish can't bite through Tooth Proof®, but this tool can! Tempered steel blades shear spring hard wire and cable clean leaving a flat, safe-to-handle straight edge. Spring operated hinge provides comfort by reducing fatigue. A great tool for tournament anglers and bait riggers!

Part Number
TPTPCUT

D

D. PROFESSIONAL CABLE CUTTER

Unique triangular jaws eliminate frayed ends by pulling strands together towards the center. Designed to cut wire and cable up to 3/32 in (2.4 mm). If you make Shark rigs, this tool should be in your tackle box!

Part Number
TPCABCUT

A & B STAINLESS STEEL LONG NOSE PLIERS

Nothing beats a great pair of pliers, and these are our favorites. Available in 8 in (20 cm) and 6 in (15 cm), these pliers feature comfort grip no-slip handles, long-nose design, and wire cutters. Super handy for fishing or on the boat. Stainless steel so they stand up to the harsh saltwater environment.

Part Number	
HT-LNP-6S	6 in (15 cm)
HT-LNP-8S	8 in (20 cm)

C & D CARBON STEEL LONG NOSE PLIERS

A good tool at a great price, these carbon steel pliers include comfort grip no-slip handles, long-nose design with wire cutters. Pop a pair in your tackle box or keep them on your tackle bench at home. Great for 1001 uses. Available in 8 in (20 cm) and 6 in (15 cm).

Part Number	
HT-LNP-6	6 in (15 cm)
HT-LNP-8	8 in (20 cm)

Extra long cuff extends up to the wrist for added comfort and protection

Wrap-around 4-ply section covers on outer edge and side of hands

3-ply SuperFabric on the fingers is the perfect combination of protection and dexterity

4-ply SuperFabric on the palm offers superior protection against the sharpest objects and maximum grip for wire and mono leaders

SEA GRIP®

A. SEA GRIP® SUPERFABRIC® OFFSHORE GLOVES

The Sea Grip Offshore Glove is the ultimate in protection for your hands. It features an extended 3-ply SuperFabric fingertip wrap-around plus a generous area of 4-ply SuperFabric protection on the palms. Whether you're leadering a thousand-pound marlin, grabbing a toothy fish at boat side, or filleting a pile of fish, this multiple layer protection is extremely resistant to punctures and cuts, yet flexible for excellent dexterity. The outer layer makes gripping slippery fish a snap, and provides protection when leadering large game fish to the boat - even with wire leaders! These are the best protective gloves available anywhere and they are a Sea Grip exclusive. Sold as a Pair.

Part Number
HG-TP3000

B. NON-SLIP GLOVES - PATTERN

Made from heavy-duty woven cotton, the outside surface is reinforced with a checkerboard pattern of soft, adhesive "rubber" that gives you an incredible grip no matter how wet they get. Use them for everything from cutting bait to washing the boat and stop worrying about things slipping out of your wet hands. Machine washable.

Part Number
HG-404-L

C. PREMIUM NON-SLIP GLOVES

Woven from a heavy-duty cotton-poly blend, these water-friendly work gloves have an ergonomically designed, form-fitting rubberized gripping surfaces. Great on the boat, in the workshop, or for almost any kind of chore. Machine washable.

Part Number
HG-310-L
HG-310-XL

D. NON-SLIP GLOVES - SOLID

Woven from a heavy-duty cotton-poly blend, these water-friendly work gloves have rubberized gripping surfaces. Great on the boat, in the workshop or for almost any kind of chores. They are a real value so buy them by the bag and always have a pair on hand.

Part Number
HG-502-L

E. VINYL WATERPROOF GLOVE

These are the same cloth-backed vinyl work gloves used by commercial fishermen for the toughest, nastiest jobs. They feature a double-dipped, seamless PVC non-slip surface from the wrist to the fingertips and a high-top cuff that extends up your arm to keep your sleeves dry while providing excellent grip. Remains flexible in cold temperatures and is completely waterproof, impervious to most chemicals, and roomy enough to fit a light pair of cotton gloves inside for extra warmth. The next time you get stuck having to cut bait, these are the gloves to wear.

Part Number
HG-620-L
HG-620-XL

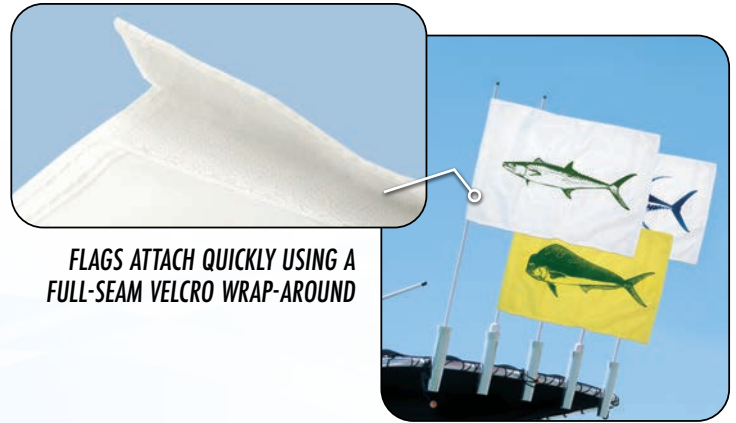

FLAGS

A must-have item for any serious fisherman, you can hoist these flags up high for all to see! All flags attach quickly and hold-fast without slipping using an exclusive full-seam Velcro wrap-around (except Release Flags as noted). Images are visible on both sides.

TROLLING WEIGHTS

The Undisputed Trolling Weight Champions - no other weights stand up to C&H! Designed for high-speed wahoo and big game fishing, all C&H Trolling Weights come rigged with genuine AFW 49-Strand Cable and ball bearing snap swivels. Two versions are available: a hollow weight with beads and an encased weight without beads. For best result, troll between 8 to 20 knots.

HOLLOW STYLE (MOST POPULAR)

Tapered, unique diamond shape resists bending like cigar shaped weights

AFW 49-Strand cable is loose inside the weight and the beads prevent it from sliding through

True-to-weight, not underweight like other brands

Solid lead, fortified with an additive for increased stiffness

Rigged with genuine AFW 49-Strand cable and ball bearing snap swivels

Bait Bag

FISH BAGS

Fish Bags are great for icing fish in tournaments or for boats that need more fish storage. These insulated bags have heavy duty zippers and clean-up easily with soap and water. Folds up for compact storage and has handles for easy carrying.

Bait Bags are designed to keep ribbonfish and other frozen baits fresh-frozen. This insulated bag has eight sewn pockets for holding frozen freezer packs.

	Size/Style	Dimensions	Part Number

SHARK FLOAT

With its bright white base and fluorescent orange bands, the AFW Shark Float sits on top of the water to provide a visual reference on the position of your line. Balloon floats can break and litter the ocean, but this foam float is durable and reusable so it offers an environmentally friendlier way to control the depth of your baits, especially while drifting. The anti-chaffing straw is included to prevent cable damage to the float by protecting the foam against friction.

Shark Float

	Length in (cm)	Width in (cm)	Part #
A	6 (15.2)	3 (7.6)	TA-SF6RW
B	9 (22.8)	3 (7.6)	TA-SF9RW

The AFW Shark Float sits on top of the water to provide a visual reference on the position of your line.

LUMINOUS SHARK RATTLE

Scientists know that game fish are attracted to certain sound waves. That's why these unique rattles are so popular with offshore anglers. They contain a single large ball bearing inside a tuned chamber of luminescent plastic that puts out a distinct click as it rolls from one side to the other. No shark or swordfish rig is complete without one, and even marlin and tuna anglers are using them. Charge them under a light source and they glow in the dark.

	Length	I.D.	Color	Pieces per Pack	Part #
C	2 in (5.1 cm)	0.11 in (2.75 mm)	Luminous Light Green	1	HA-LUMRAT
C	2 in (5.1 cm)	0.11 in (2.75 mm)	Luminous Light Green	50	HA-LUMRAT/50

LUMINOUS COMPONENTS GLOW IN THE DARK!

SHARK RIG

This Economy Shark Rig is professionally assembled, twisted, and crimped and it is ready to fish right out of the bag with minimal bait prep. Shark rigs work best when the bait is fresh and locally caught. Using standard shark baits, such as bluefish, mackerel, and other oily fish will work best to attract sharks since these streamlined bait-fish allow for an easier hook-set. For best results, hook the bait-fish through the eyes or through the bottom lip up to make the bait more streamlined and prevent it from spinning. Adding a skirt over the bait also works well since the combination of both can be used as a means to attract the shark's attention, while at the same time, concealing the hook.

Shark Rigs

Hook	7x7 Cable	Single Strand Leader	Part #
12/0 Mustad Circle Hook	Bright, 8 ft (2.44 m)	Camo Brown, .035 in (0.89 mm), 4 ft (1.22 m)	TA-SKRD-C-12/0
16/0 Mustad Circle Hook	Bright, 8 ft (2.44 m)	Camo Brown, .035 in (0.89 mm), 4 ft (1.22 m)	TA-SKRD-C-16/0

**Available in two Sizes:
12/0 & 16/0**

Professionally assembled, twisted, and crimped, this rig incorporates all the essential components!

- **WHEN BAITED WITH FINGER MULLET, THIS RIG IS AN EXCELLENT LURE FOR BLUEFISH AND DRUM**

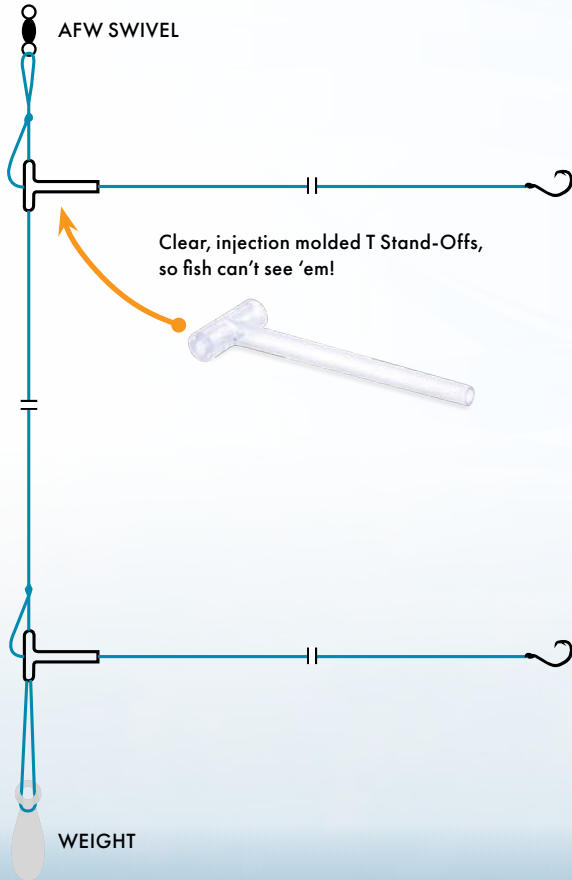

BLUEFISH / DRUM

NEW HOME OF **AQUA-CLEAR®**

AQUA-CLEAR TACKLE

A longtime favorite for anglers throughout the Mid-Atlantic region, Aqua-Clear Tackle has been producing and selling high quality rigs for over 40 years by providing single and double bottom fishing rigs utilizing clear injection molded components that minimize tangles and ready to use right out of the package. These rigs are produced with the highest quality components, and the signature Aqua-Clear T-Standoff helps prevent tangles and maintains a distance between the main leader and hook sub leaders.

HOW TO USE

Prior to lowering to the bottom: The upper stand-off should be in the normal position with the top hook leader fully extended. The stand-off will keep tangles to a minimum.

Prior to casting: Tangles are normally incurred when casting. This can be reduced by setting the adjustable upper stand-off to the lowered position. The hook must be baited. The stand-off will return to its normal position with the leader fully extended before reaching the bottom.

SMOKER CHOKER™
Overall Length: 4 in (10.1 cm)

The C&H Smoker Choker is a proven tournament winner. This lightweight lure has a luminescent head that glows in low light conditions. Works great at slow speeds, between 4-6 knots, for Kingfish, Sailfish, Dolphin and Tuna. Ideal for use on a downrigger or subsurface bait. The Smoker Choker can be trolled plain or in conjunction with dead or live bait.

 CH-KR Kingfish Pro-Rig with King Buster Lure Retail Pack

ALSO AVAILABLE

KINGFISH PRO-RIG WITH KING BUSTER® LURES

The C&H King Buster Kingfish Pro-Rig, denoted with an 'KR' in the part number, is one of the finest live bait rigs available. The combination of AFW Tooth Proof Wire married with the tried-and-true C&H King Buster Lure and Mustad Hooks make this rig a deadly weapon for tournament fishermen. Using these with a strip-bait, cigar minnow, or rigged in front of live bait will improve action, add color, and increase strikes. The rig features:

- King Buster Lure
- Two #4 4x Mustad Treble Hooks
- AFW Swivel
- AFW #5 Tooth Proof Leader Wire, Camo Brown

To slow troll or drift, use single hook point to go through live bait nostrils. Let treble hook hang loose or attach to back. For use with pogys, menhadens, cigar minnows, ballyhoo, or any other live bait.

LIVE BAIT RIG

The C&H Live Bait Rig combines AFW Tooth Proof Wire with the tried-and-true Mustad Hooks to make these rigs a deadly weapon for tournament fishermen. Using these with a strip-bait, cigar minnow, or rigged in front of live bait will improve action, add color, and increase strikes. There are 4 different hook configurations to choose from, and all rigs feature:

- Mustad Hooks
- AFW Swivel
- AFW Tooth Proof Leader Wire, 3 ft (0.91 m), Camo Brown

To slow troll or drift, use single hook point to go through live bait nostrils. Let treble hook hang loose or attach to back. For use with pogys, menhadens, bunker, cigar minnows, ballyhoo, or any other live bait.

This lure is deadly on all types of dolphin, and will also catch tuna, wahoo, and billfish!

ACTUAL SIZE

MAHI BUSTER **BLING**

Overall Length: 6 in (15.2 cm)

The Mahi Buster Bling, is a light weight lure designed to run straight and dance on the surface of the water. Featuring weighted glitter head and holographic skirts, this lure is deadly on all types of dolphin, and will also catch tuna, wahoo, and billfish. Runs straight just below the surface, and works great with or without bait.

ALIEN® CHUGGER

Overall Length: 6.5 in (16.5 cm)

Overall Length XL: 8.5 in (21.6 cm)

The Alien Chugger takes its design from the classic Alien with the added benefit of a flesh-like body and head. The result is a lure that runs true and straight with an erratic popping motion. This lure can be used with or without bait to raise some giant fish!

Alien Chuggers are available in two sizes. Choose the perfect version for your rig!

ALIEN®

Overall Length: 7.5 in (19 cm)

The C&H Alien® has a concave acrylic head to provide a "digging" action giving a large bubble trail and allowing it to be trolled fast. Hook or bait slides up into the hollow head. Great lure trolled plain or with natural bait. Fish can't resist its hologram eye. Run this lure off your left/right short rigger on a choppy day and watch it dance - out of this world action!

ALIEN® XL

Overall Length: 10.5 in (26.7 cm)

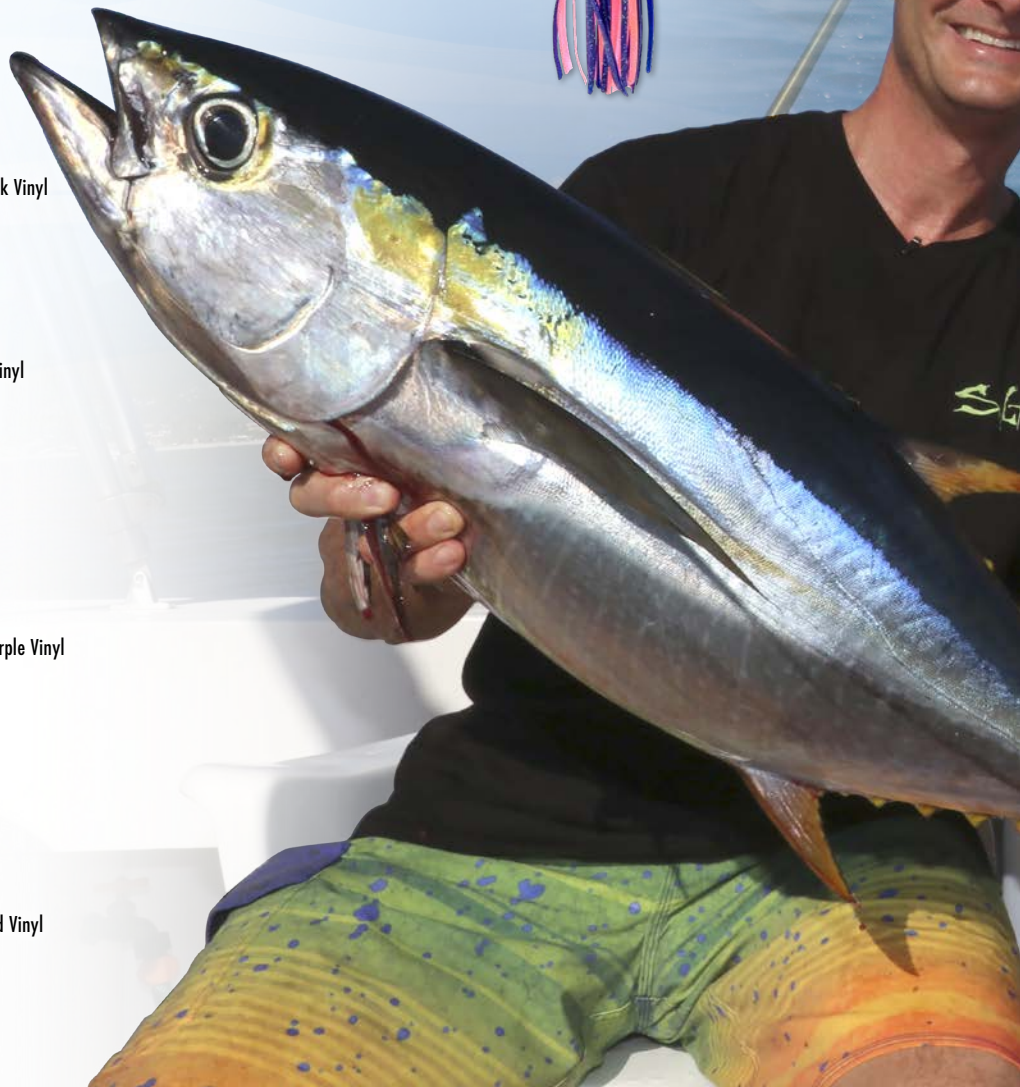

The Alien XL is a larger version of the popular Alien - its concave acrylic head provides a "digging" action, which leaves a large bubble trail when trolled fast. Hook or bait slides up into the hollow head. Great lure trolled plain, out of this world action. Troll at 4-6 knots.

Rigging Kits Sold Separately
See pages 124-125 for details.

WAHOO WHACKER™

Overall Length: 12.5 in (31.7 cm) | 6 oz (170 g) Head

The Wahoo Whacker weighs in at 6 oz and has a missile shaped, weighted head that leaves a minimum bubble trail. This shape allows it to run deeper in the water and can be trolled at any speed. Works great on the downrigger.

ALSO AVAILABLE

RIGGED & READY

TWO VERSIONS:

MONO (WRC)

Mono Rigged & Ready version (denoted with an 'WRC' in the part number) features a Mustad Duratin 10/0 Mustad Hook, AFW Swivel, 200 lb (90.7 kg) Grand Slam Mono Line, 12 ft (3.6 m).

CABLE RIG (WRCC)

Cable Rigged & Ready version (denoted with a 'WRCC' in the part number) features a Stainless Steel 8/0 Mustad Hook, AFW Swivel, 275 lb (124.7 kg) AFW 49 Strand Cable, 6 ft (1.8 m).

Rigging Kits Sold Separately
See pages 124-125 for details.

Optional:

WAHOO WHACKER™ XL

Overall Length: 16 in (40.1 cm) | 11 oz (311 g) Head

Wahoo absolutely love this big lure trolled at high speeds. The Wahoo Whacker XL has an 11 oz urethane coated head and two 12 inch skirts. This lure is built to handle speeds of 20 knots. Works great with a trolling lead or on the surface. No bait necessary. The XL works best when trolled 8 knots or faster. Catches of large dolphin and blue marlin have also been reported. Made in USA.

Rigging Kits Sold Separately

TUNA TANGO®

Overall Length: 5.75 in (14.6 cm) | 1.75 oz (50 g) Head

The Tuna Tango was designed to run straight and deep. With the weighted head, the Tuna Tango is ideal for use in rough sea conditions and higher speeds. The Tuna Tango is deadly - plain or rigged in front of live bait - and has proven deadly on all game fish. Use these with a strip-bait, a ballyhoo, or rigged plain, to improve action and increase strikes.

ALSO AVAILABLE

RIGGED & READY

ONE VERSION:

MONO (RR)

Mono Rigged & Ready (denoted with an 'RR' in the part number) features a 7/0 Mustad Hook, AFW Swivel, 100 lb (45.3 kg) Grand Slam Mono, 6 ft (1.8 m).

TUNA TANGO® XL

Overall Length: 8.5 in (21.6 cm) | 2.5 oz (71 g) Head

Formerly known as the Tuna Witch®, the Tuna Tango XL is designed to run straight and deep. With the weighted head, the Tuna Tango XL is ideal for use in rough sea conditions and higher speeds. The Tuna Tango XL is deadly - plain or rigged in front of live bait - and has proven deadly on all game fish. Use these with a strip-bait, a ballyhoo, or rigged plain, to improve action and increase strikes.

LIL' STUBBY™ **CHUGGER**

Overall Length: 5.5 in (13.9 cm)

The Lil' Stubby Chugger takes its design from the classic Lil' Stubby with the added benefit of a flesh-like body and head. The result is a lure that runs true and straight with an erratic popping motion. This lure can be used with or without bait to raise some giant fish!

JET HEAD

Overall Length 2.5 oz Head: 9 in (22.8 cm)

Overall Length 5 oz Head: 10.5 in (26.6 cm)

This all-time favorite lure, the C&H Jet Head, has a chrome head with extra holes that produce a stream of bubbles below the surface of the water. The pointed and weighted head allows the lure to run straight and deep, putting it in the hot zone. Possibly the most productive lure in the C&H line-up, we always run a Jet Head on our right flat on top of a ballyhoo. Troll plain or with natural bait.

EXPRESS DEEP RUNNER™ - ULTIMATE SERIES

Weight: 15 oz (425 g), Length: 15.5 in (39.4 cm)

The Express Deep Runner Ultimate Series was designed specifically for high-speed wahoo trolling. The chrome-plated jet head is perfectly balanced to run true and create a prominent bubble trail while trolled at speeds up to 20 knots. The unique, weighted head features dual cone style ends for tie-on skirts. The best results are obtained when pulled as a flat or shotgun line.

The Billy Baits Turbo Slammer is designed for smoke and turbulence trails when trolled 5-12 knots and used with or without baits. Rigging is simple - push the eye of the leader through the rear of the Turbo Slammer and rest the bill in the head of the rear cavity. This will make the bait track naturally and you can troll several knots faster. Recommendation: Put Billy Baits out as soon as you can - trolling out and back. Don't waste your fishing time!

**BENEATH THE SKIRT**

Beneath the skirt of every Turbo Slammer exists a large hole and concave scoop area designed for the nose of baitfish to tuck up inside.

SUPER SMOKER™ II

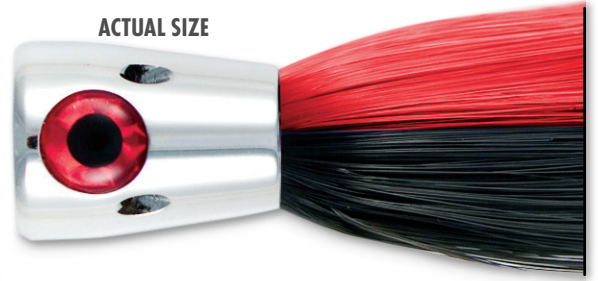

Weight: 2 oz (0.05 kg), Length: 8 in (20.3 cm)

The Super Smoker II combines action of the jetted Super Smoker head II with the life-like appearance of a Sea Witch. This lure can be trolled plain or in combination with dead bait. The two-part design protects against damage to the threads and hair. The plated aluminum heads are very durable and will outlast other plastic lures.

DOUBLE CAVITATOR™

Weight: 2 oz (0.05 kg), Length: 7 in (17.7 cm)

Double Cavitator is a third of the size of the Super Magnum and with its precision machined head and Billy's special 360 degree turbulence ring, this lure is designed for smoke and turbulence trails. This all-time favorite is extremely productive trolled plain, but especially deadly with natural ballyhoo or Billy's Bonita Strip. Troll between 2 to 20 knots.

ALSO AVAILABLE

RIGGED & READY

ONE VERSION:

MONO (DCR)

Mono Rigged & Ready (denoted with an 'DCR' in the part number) features a 7/0 Mustad Hook, AFW Swivel, 130 lb (58.9 kg) Grand Slam Mono, 6 ft (1.8 m).

SUPER MAGNUM™

Weight: 6 oz (0.17 kg), Length: 8 in (20.3 cm)

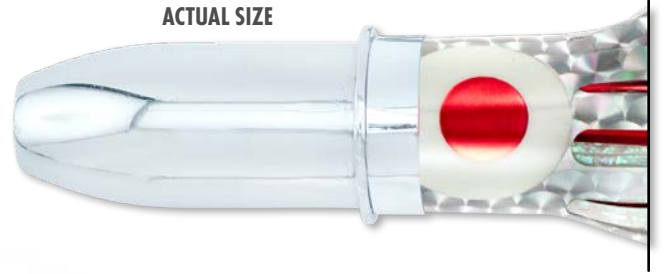

With its precision machined head and Billy's special 360 degree turbulence ring, this lure is designed for smoke and turbulence trails. This chrome plated brass lure can be used with or without bait and is ideal for wahoo, tuna and all billfish. Troll between 2 to 20 knots.

AHI SLAYER™

Weight: 1 oz (0.028 kg), Length: 5 in (12.7 cm)

The Ahi Slayer is a light weight lure designed to run straight and dance on the surface of the water. The lure is deadly on all types of tuna and will catch dolphin, wahoo and billfish. The lure works great with or without bait. Available with feather/vinyl skirts or with holographic silicone skirts.

ALSO AVAILABLE

RIGGED & READY

ONE VERSION:

MONO (RR)

Mono Rigged & Ready (denoted with an 'RR' in the part number) features a 7/0 Mustad Hook, AFW Swivel, 100 lb (45.3 kg) Grand Slam Mono, 6 ft (1.8 m).

MAGNUM TURBO WHISTLER™

Weight: 2 oz (0.056 kg), Length: 4 in (10.1 cm)

The Magnum Turbo Whistler features multiple jets for unbelievable action. The lure head weighs about 2 oz but stays down due to the cupped head design. The mylar under skirt is topped with a 4 inch rubber skirt. The lure works great with or without bait. Works best when pulled at 7-9 knots and catches dolphin, wahoo, tuna, kingfish and other small billfish.

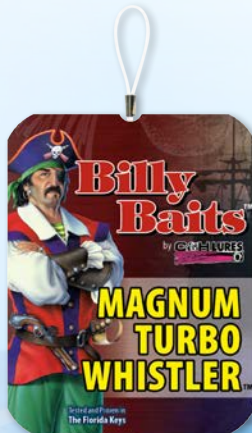

ALSO AVAILABLE

RIGGED & READY

BILLY WITCH™

Weight: 0.25 oz (0.007 kg), Length: 6.5 in (16.5 cm)

The chrome / brass head is weighted just enough to keep the bait down. Nylon hair is hand tied with right amount of hair not to hide the bait and strip of mylar to provide a flash. The hole is large enough for a Ballyhoo bill and possible to slide over the top of your leader for quick change. Troll between 2 to 8 knots.

ALIEN® JIG - OFFSHORE SERIES

The Alien Jig Offshore Series has become one of the hottest selling lures we have ever created. The angled head allows the lure to sink fast and always land upright. Originally designed for bottom fishing, our customers quickly reported unbelievable success with dolphin, cobia, stripers, bluefish, grouper, snapper, tuna, sea bass and jacks. Each jig comes pre-rigged with a swinging hook set.

AFW COLOR-CODED TERMINAL TACKLE PACKAGING

The color bars on the tops of the terminal tackle packages makes merchandising and restocking much easier. Plus the color-coding helps your customers quickly find the exact products they're looking for... and they make your store look great! See pages 42-65 for tackle!

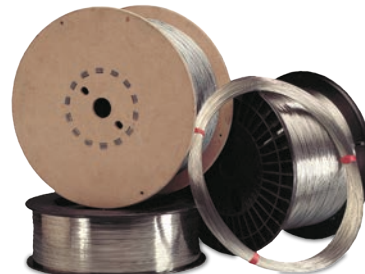

Color-coded packaging helps your customers quickly find the right products!

BULK WIRE FOR TACKLE MANUFACTURERS

AFW has the experience, skill, and desire to help you with your special fishing wire and cable requirements. We can supply wire, strand, and cable cut to length, in bundles or hanks, or on a large selection of coil and spool dimensions and weights not listed in this catalog. For more information please contact our Sales office.

PLANOGRAM PROGRAMS

We can design custom planograms around store requirements. We can prepare large, full line planograms containing a broad variety of items, or smaller, more product-specific panels. Most of our retail products are dimensionally correct for merchandising on pegboard and slatwall. Some of our larger, heavier retail products can be shelved or placed on the base deck. All retail products contain UPC labeling.

PEGBOARD SPINNERS

The 2-sided and 4-sided spinner displays are the perfect solution for retailers looking to add a comprehensive range of tackle in a limited space. Our 2-sided, free-standing spinner takes up little more than one square foot of floor space, and can hold a good selection of products. We can provide custom header signs for your store (see examples below). Both displays are durable and easy to assemble.

Four-Sided Pegboard Spinner

- 8" wide x 8" deep x 20" high (20.3 cm x 20.3 cm x 50.8 cm)
 - Revolving base
 - Blue (translucent)
- Ships assembled at 7 lb (3.2 kg)
- 50, 4" metal hooks and header included

8011-010

Two-Sided Pegboard Spinner

- 16" wide x 60" high (40.64 cm x 152.4 cm)
- Revolving base
- Blue (translucent)
- Ships flat in two boxes
- Easy assembly, no tools required 37.4 lb (17 kg)
- 100, 4" metal hooks and header included

8001-100

Spool Shelf for Two-Sided Spinner

8011-020

Trusted for over 95 Years...

AFW[®]

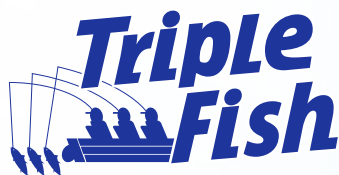

FISHING BRANDS

AFW is the leading US wire leader producer and the originator the world's first knottable leader wire. We offer the industry's most complete line of wire products made in the United States. Our brands include Tooth Proof, Surfion, Surfstrand and 49 Strand. We also offer a wide array of advanced products including kink-free and knottable wire, copper trolling wire and Mighty Mini 100% stainless steel tackle.

Hi-Seas is rapidly becoming the line of choice by many top anglers, pros and TV personalities. We offer a complete line of mono, fluorocarbon and super line products. Grand Slam, Quattro, Black Widow and Hi-Seas 100% fluorocarbon are asked by name worldwide. Together, both brands offer a complete range of fishing gear ranging from line and leader to tools and gloves.

The Original...Since 1961

No matter where you're headed or what you're headed for, Triple Fish mono and fluoro are dependable, angler-friendly fishing lines that offer unbeatable value for weekend warriors! These European-made monofilament and fluorocarbon fishing lines are known for their perfect combination of quality and value that rookie and veteran anglers will immediately recognize the outstanding value of Triple Fish!

For more than four decades, C&H Lures are known the world over for catching tournament winning fish. Each and every C&H Lure was designed by fishermen for fishermen. No matter if you're fishing competitively for billfish, wahoo, or kingfish, or just out on the water for fun, drop back C&H Lures and get ready for action. Regardless of the conditions, C&H Lures are deadly effective on all striking saltwater fish. The results and legendary product names like King Buster, Lil' Stubby, Stubby Bubbler, Alien, Tuna Tango, Wahoo Wacker, Rattle Jet and Seawitch speak for themselves. Be a winner with C&H!

Born in the Florida Keys in 1993, Billy Baits have been raising fish in record numbers ever since. This innovative line of metal head trolling lures is deadly effective for catching tuna, wahoo, dolphin, sailfish, blue marlin, white marlin, striped marlin and kingfish. Every Billy Bait is designed to run straight and true and to be irresistible to game fish. There's the notorious Mr. Big and Smoke Rattle & Troll lures that incorporate drilled jets and internal rattles for high speed wahoo trolling, the infamous Mini Turbo Slammer and Master Hooker lures that create killer smoke and turbulence trails, and the deadly Ahi Slayer that dances on the surface of the water and mesmerizes dolphin, wahoo, and small billfish. No matter which Billy Bait you choose, have your drag set and be ready for action!

The enduring No-Alibi line of lead-head lures and jigs was first introduced in 1926 and has remained some of the hottest selling and most productive lures for catching fish to this day! The unique feather and vinyl skirted Dolphin Delight trolling lure is THE most effective lure for catching dolphin ever created, and the versatile Alien Jig, that sinks fast and stays vertically planted on its head, catches not only bottom fish like grouper, snapper, sea bass and jacks, but also cobia, striped bass, bluefish, and tuna. There are lots of imitators - but no knockoffs compare and no striking fish can resist genuine No-Alibi!

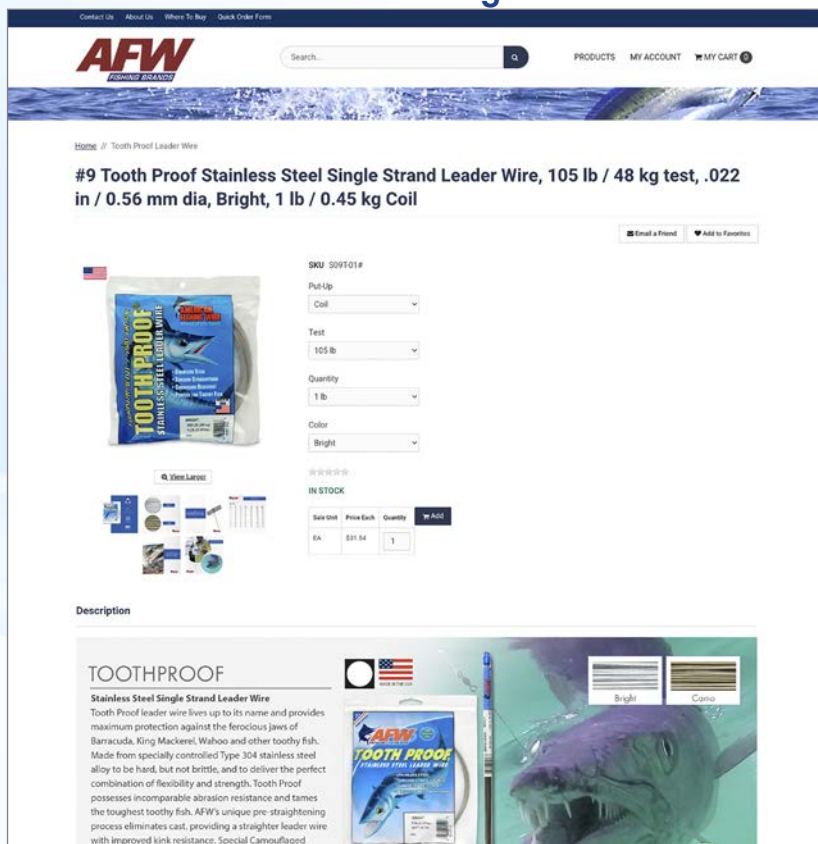

AQUA-CLEAR[®]

A longtime favorite for anglers throughout the Mid-Atlantic region, Aqua-Clear Tackle has been producing and selling high quality rigs for over 40 years by providing single and double bottom fishing rigs utilizing clear injection molded components that minimize tangles and ready to use right out of the package. Our rigs are produced with the highest quality components, and our signature Aqua-Clear T-Standoff helps prevent tangles and maintains a distance between the main leader and hook sub leaders.
